

The lake assessments are created in partnership with Hillsborough County and the Florida Center for Community Design and Research
LAKE ASSESSMENT DOCUMENT

Agles Landing Lake 8/19/98 Watershed: Bullfrog/ Wolf Branch

Lake assessments are being conducted to contribute physical and ecological data to the Atlas as a collaborative effort between project partners. The goal is to rapidly assess many of the lakes in the county and thus provide stakeholders a better understanding of the character of the lake, its shore, and the aquatic plants present there. These data are intended to assist in the future management of the lake and its watershed.

The first section of the report provides the results of the bottom mapping effort: a contour (bathymetric) map of the lake, area, volume and depth statistics, and the water level at the time of assessment (if available).

The second section provides the results of the ecological (vegetation) assessment conducted on the lake. These results can be used to better manage vegetation in your lake. A list is provided with the different plant species found at various sites around the lake. Potentially invasive, exotic (non-native) species are identified in a plant list and the percent of exotics is presented in a summary table. The results of this study are compared with other lakes in the watershed.

The intent of the assessment is to provide a starting point from which to track changes in your lake. These data can provide the information needed to determine changes and to monitor trends in physical condition and ecological health of the lake.

I. Physical Data – Area, Depth, Volume, & Bottom Contours

The bottom of the lake was mapped using a sophisticated Global Positioning System (GPS) to determine the boat’s position, and a depth-finder to provide depth associated with that measured position. The result is an estimate of your lake’s area, mean and maximum depths, and volume (Table 1) and the creation of a bottom contour map.

Table 1. Physical Characteristics of Your Lake.

Surface Area (acres):	_____ 9 _____
Mean Depth (feet):	_____ _____
Maximum Depth (feet):	_____ 13.7 _____
Volume (gallons):	_____ _____

II. Ecological Data

Aquatic Plant Survey

Approximately equispaced sites are haphazardly mapped around the lake and the aquatic plants at each site are surveyed. The total number of species from all sites is used to approximate the total diversity of aquatic plants and the percent of invasive-exotic plants on the lake and in the watershed (Table 2). Many of these plants are considered ecologically harmful, as they tend to out-compete native species. Such “nuisance” plants can also make boating and other recreational activities difficult or impossible. The common and scientific names of plant species found on your lake are listed in Table 3.

Table 2. Comparison of species diversity between your lake and other assessed lakes located within your watershed.

	<u>Eagles Landing Lake</u>	<u>Bullfrog/ Wolf Branch Creek</u> (Average)
Number of Taxa:	30	30
Percent Exotic Plants:	10%	10%

Table 3. Botanical and common names of the most commonly found plants on your lake. Percent frequency (of occurrence), habit (location where found), status (native or exotic), and EPPC status are provided.

<u>Common Name</u>	<u>Plant Species</u>	<u>Frequency</u>	<u>Habit</u>	<u>Status</u>	<u>EPPC</u>
Alligator Weed	Alternanthera philoxeroides	90%	Emergent	Exotic	II
Water Primroses, Primrosewillow	Ludwigia spp.	80%	Emergent	Unknown	NL
Climbing Hempvine	Mikania scandens	80%	Emergent	Native	NL
Wax Myrtle	Myrica cerifera	80%	Emergent	Native	NL
Southern Wood Fern	Dryopteris ludoviciana	60%	Emergent	Native	NL
Cinnamon Fern	Osmunda cinnamomea	60%	Emergent	Native	NL
Maidencane	Panicum hemitomon	60%	Emergent	Native	NL
Manyflower Marshpennywort, Water Penny	Hydrocotyl umbellata	40%	Emergent	Native	NL
Cattails	Typha spp.	40%	Emergent	Native	NL
Buttonweed	Diodia virginiana	30%	Emergent	Native	NL
Willow	Salix spp.	30%	Emergent	Native	NL
Burhead Sedge, Cuban Scirpus	Scirpus cubensis	30%	Emergent	Native	NL
Bog Hemp, False Nettle	Boehmeria cylindrica	20%	Emergent	Native	NL
Common Buttonbush	Cephalanthus occidentalis	20%	Emergent	Native	NL
Sandweed, Peelbark St. John's-wort	Hypericum fasciculatum	20%	Emergent	Native	NL
Carolina Redroot	Lachnanthes caroliniana	20%	Emergent	Native	NL

Agles Landing Lake 8/19/98 Watershed: Bullfrog/ Wolf Branch

Watergrass	<i>Luziola fluitans</i>	20%	Emergent	Native	NL
Torpedo Grass	<i>Panicum repens</i>	20%	Emergent	Exotic	I
Water Spangles, Water Fern	<i>Salvinia minima</i>	20%	Floating	Native	NL
Cypress	<i>Taxodium spp.</i>	20%	Emergent	Native	NL
Marsh St. John's Wort	<i>Triadenum virginicum</i>	20%	Emergent	Native	NL
Yellow-eyed Grass	<i>Xyris spp.</i>	20%	Emergent	Native	NL
Southern Red Maple	<i>Acer rubrum var. trilobum</i>	10%	Emergent	Native	NL
Bur Marigold	<i>Bidens spp.</i>	10%	Emergent	Native	NL
Dayflower	<i>Commelina spp.</i>	10%	Emergent	Exotic	NL
Sedge	<i>Cyperus spp.</i>	10%	Emergent	Unknown	NL
Swamp Hornpod, Miterwort	<i>Mitreola sessilifolia</i>	10%	Emergent	Native	NL
Horned Beak Rush	<i>Rhynchospora cornulata</i>	10%	Emergent	Native	NL
Catbriar, Greenbriar	<i>Smilax spp.</i>	10%	Emergent	Native	NL
Dimorphic Chain Fern	<i>Woodwardia areolata</i>	10%	Emergent	Native	NL

Standing Crop

In addition to an overall survey of the types of plants on a lake, an estimate of the standing crop (biomass) of the lake has been obtained for many lakes. This was done by calculating the average weight of the vegetation within a quarter-meter square quadrat tossed haphazardly into three zones (see Figure) at each sampling site around the lake: (1) the emergent zone, (2) the floating zone and (3) the submersed zone. The average weight of the plants (Table 4) from all sampling sites and the dominant type of vegetation (Table 5) are provided. If data tables are not shown, no standing crop estimates were obtained for this lake.

Table 4. Comparison between the average biomass from three zones within your lake and among all lakes assessed within your watershed.

	<u>Eagles Landing Lake</u>	<u>Bullfrog/ Wolf Branch Creek</u> (Average)
Emergent Zone:		
Floating Zone:		
Submersed Zone:		

Number of lakes sampled in your watershed: 1

Note: All biomass measurements are shown in kilograms per square meter.

Table 5. Dominant taxa from three zones within your lake.

<u>Zone</u>	<u>Dominant Plant</u>	<u>Status</u>
Emergent Zone:		
Floating Zone:		
Submersed Zone:
